Profile

Computer Science graduate and Systems Development Analyst with experience spanning application development, deployment, and production maintenance. Progressed from intern to analyst, taking responsibility for technical decisions and software delivery. Seeking to grow into a DevOps role, building on practical experience in full stack development and server administration.

Experience

Manghá Agency — Jundiaí, Brazil
Systems Development Analyst — *Oct 2026 – Present*

- Develop and maintain full stack web applications using PHP, TypeScript, JavaScript, Laravel, Express, React, and Astro.
- Build APIs and integrate external services, using MySQL and PostgreSQL for application data.
- Select application architecture and technology stacks, and manage source code versioning with Git.
- Define CI/CD processes and manage application deployments using Jenkins and Docker.
- Administer Linux VPS environments, configuring domains, DNS, HTTPS, and backups; use Grafana and Prometheus for monitoring.
- Perform software testing, write technical documentation, and troubleshoot production issues.

Manghá Agency — Jundiaí, Brazil
Web Programming Intern — *Jun 2025 – Sep 2026*

- Maintained client websites and implemented feature updates.
- Developed web platforms, contributing to front-end, back-end, and database-backed features.
- Monitored and troubleshot Linux, Apache, Nginx, and cPanel hosting environments.

SOBIT Tech Solutions — Várzea Paulista, Brazil
IT Support Intern — *Oct 2024 – Jun 2025*

- Resolved client support tickets by diagnosing software, platform, and infrastructure issues.
- Tested platforms to reproduce, validate, and report functional defects before release.
- Trained users on systems and provided remote technical assistance through AnyDesk.

Sulzer — Jundiaí, Brazil
Maintenance Mechanic Apprentice — *Jan 2022 – Dec 2023*

- Performed preventive and corrective maintenance on industrial equipment, following technical and safety standards.

Skills

- **CI/CD & Infrastructure:** Jenkins, Docker, Git, Linux, VPS administration, DNS, HTTPS, backups, Grafana, Prometheus
- **Professional Programming & Web Development:** PHP, TypeScript, JavaScript, Laravel, Express.js, React, Astro, API development and integration
- **Databases:** MySQL, PostgreSQL, SQL
- **Software Engineering:** Architecture and technology selection, version control, software testing, technical documentation, debugging, production troubleshooting
- **Personal Projects & Studies:** Go (Golang), Java, backend development, data structures, algorithms, object-oriented programming
- **Languages:** Portuguese (Native), English (C1 — EF SET certified), Spanish (Basic)

Education

UniAnchieta — Jundiaí, Brazil
B.Sc. in Computer Science — *Jan 2022 – Dec 2025*

SENAI Conde Siciliano — Jundiaí, Brazil
Technical Degree in Maintenance Mechanics — *Jan 2022 – Dec 2024*

ETEC Vasco Antônio Venchiarutti — Jundiaí, Brazil
Technical Degree in Internet Computing — *Jan 2019 – Dec 2021*

ETEC Vasco Antônio Venchiarutti — Jundiaí, Brazil
High School Diploma — *Jan 2019 – Dec 2021*
